Core Features

Technical Advantages

1. Web3 Technology:

The blockchain-based registration system ensures that no third party can access user data.

2. Privacy and Security:

Hashed files and a user-specific private key guarantee full privacy and data protection.

3. Fast Integration:

Users can easily integrate OCOS Cloud services into their devices, with minimal data transfer times.

4. User-Friendly:

No personal information is required for registration. The process is completed solely using a crypto wallet address.

1. 1 Terabyte Storage Space (Standard Package)

We provide all customers with a minimum of 1 terabyte of storage space. For users needing more capacity, **Premium** and **VIP** options are available.

2. Blockchain-Based Structure

OCOS Cloud utilizes blockchain technology for its operations. No personal information is required for registration. The process is carried out solely with the user's crypto wallet address, ensuring privacy is maintained.

3. User Data Security

- OCOS Cloud's blockchain-based infrastructure ensures that only users have access to their data.
- Each file is stored in a hashed format, protecting it from tampering or unauthorized access.
- No one other than the user can access the data. If the user loses their private key, the data cannot be retrieved.

4. Easy Data Transfer

- Users can easily transfer data from their phones to the cloud and vice versa. Transferring all files takes only 1 to 5 minutes.
- Fast and reliable data transfer ensures the best user experience.

5. Subscription System and Customer Satisfaction

OCOS Cloud offers a satisfaction guarantee and various subscription options tailored to user needs.

Subscription Options

\$ 4.99 / mo
